

stop repeating yourself

# Re-explaining your business to Claude?

You type your context into every chat. **You should never type it twice.**

 **GTM Co-pilot**

PROJECT

IT ALREADY KNOWS

Your **ICP, pricing, brand voice and past decisions**, loaded into every chat, automatically.

# Three things, **once**

## Your rules

voice, tone, what to never do

instructions

## Your docs

ICP, pricing, decks, transcripts

knowledge

## Your context

what you already decided

memory

# No more **context dump**

✕ PLAIN CHAT

You: "Write a cold email."

Claude: "Sure, who is it for? What do you sell? What tone do you want?"

You: paste your ICP, your offer, your voice... again.

☑ INSIDE THE PROJECT

You: "Write a cold email."

Claude: already has your ICP, your offer and your voice from the Project, **so it just writes it**, on brand, first try.

# Build it once. Never **repeat yourself** again.

## New Project

name it after the job, not the tool

## Paste your rules + docs

instructions and knowledge files

## Work inside it

every chat starts smart
