

ZERO CODE

LAUNCH YOUR PRODUCT IN 24 HOURS.

Not a mockup. A link you can send a customer tonight.

You have had the idea for months. The gap was never the idea.

ULTRON · 51ULTRON.COM

HOUR 1

DESCRIBE IT ONCE.

One paragraph. What it does, and who it is
for.

No repo to clone. No stack to choose. No developer to wait
on.

~~a repo to clone~~

~~a stack to choose~~

~~a dev to wait on~~

one paragraph

ULTRON · 51ULTRON.COM

HOUR 2 - 10

IT **BUILDS** THE WHOLE THING.

Pages, copy, the signup, the payment link.

Written in your voice from things you already said, not from
a template.

build the page, the signup and a way
to pay

writing the pages and the copy in your
voice

signup wired, payment link live

BRIEF → **BUILD** → LIVE → SELL

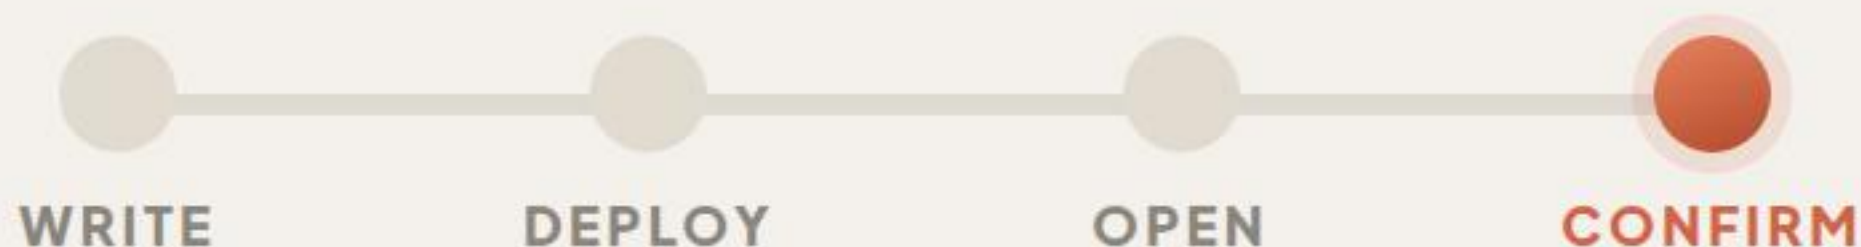

ULTRON · 51ULTRON.COM

HOUR 11 - 16

IT GOES LIVE.

A real address, then it opens the page and
checks it works.

Not a preview that expires. A URL that loads on your phone.

BRIEF → BUILD → LIVE → SELL

HOUR 17 - 24

YOU SEND THE LINK.

To a customer. Not to a designer for
feedback.

Changes are another sentence, not another two weeks.

THE BILL	24 HOURS
Agency brief and revisions	0
Developer time	0
Lines of code you wrote	0
Weeks of waiting	0
TOTAL	1 day

BRIEF → BUILD → LIVE →

SELL

WHAT ACTUALLY CHANGED

YOU STOPPED WAITING ON SOMEONE ELSE.

The bottleneck was never the product.

It was the three weeks between deciding and having
something real to show.

STATUS

LIVE

sendable today

COMMENT

LAUNCH

and I will send you the 24 hour build.

How to brief it, and how it checks its own work.
