

2-MINUTE OPERATOR GUIDE

MASTER CLAUDE IN 2 MINUTES

Use it like a **thinking partner**, not a search bar. Most people use it like **Google**. That is the problem.

DIRECTION

4 INPUTS

WEAK VS STRONG

3 MODES

SWIPE FOR THE 2-MINUTE FIX →

Stop asking for **answers**

MOST PEOPLE

- × Write me a post
- × Summarize this
- × Give me ideas

OPERATORS

- ✓ Break this into parts
- ✓ Challenge my assumptions
- ✓ 3 approaches with tradeoffs

→ **Better thinking = better outputs**

Fix these 4 inputs

Most people give 1. **Give all 4** and the output changes completely.

1

Task

→ what you want done

2

Context

→ what it should know first

3

Standard

→ what good looks like

4

Outcome

→ what success means

Same task. Different result

⚠ WEAK PROMPT

× "Write a post about AI"

✓ STRONG PROMPT

✓ Short post for founders

✓ Why most AI content fails

✓ Punchy and minimal

✓ End on a reflection, not advice

→ Specific in = usable out

Three ways to open

Think better FOR DECISIONS

When the call is yours to make.

Break this into parts

Challenge my assumptions

Give me 3 approaches

Explain clearly FOR LEARNING

When you need to actually get it.

Explain this like I am new

Use one simple example

No jargon

Execute faster FOR ACTION

When you know what, not how.

Step-by-step plan

Based on this context

I can use today

→ Pick one, paste it, go

Stop searching. Start **thinking**.

Four inputs turn Claude from a search bar into **the operator on your team**.

01 Give **direction** , not a request for answers

02 Set **task, context, standard, outcome**

03 Pick a mode: **think, explain, execute**

COMMENT **CLAUDE** →

and I will send you the exact 4-input prompt formula.
