

FOUNDER GTM · A WEEKEND BUILD

How to build your GTM engine in one weekend

5 AI AGENTS · SOLO FOUNDER · NO SALES TEAM

1	CORTEX	find who to sell to
2	SPECTER	build the outbound
3	STRIKER	run every deal
4	PULSE + AMPLIFY	publish everywhere
5	ROUTER	run it from one box

5

Steps

A solo-founder plan, from list to live

5

AI agents

One specialist per GTM job

0

Sales hires

Just you and Ultron, you approve

SWIPE TO BUILD →

STEP 1 · CORTEX

Point it at a market. Get back a ranked list.

CORTEX profiles people, companies and markets, then hands you one brief, sorted by who is worth your weekend.

CORTEX brief · founder-led, 2-50, US/UK

RANKED

RANK	SEGMENT	TRIGGER SIGNAL	FIT
01	Seed-Series A SaaS, US	just raised, hiring AEs	96
02	Boutique IT services, UK	scaling outbound, no SDRs	92
03	Founder-led software, US	new VP Sales, budget set	89
04	Consulting firm, UK	expanding into the US	85
05	Dev agency, 14 people, US	posting about pipeline gaps	81

You start Saturday with the right 50, not a list of 5,000. **Right list beats more list.**

STEP 2 • SPECTER

One brief in. A whole **sequence** out.

SPECTER writes the cold email, the follow-ups and the break-up as one multi-step sequence, ready before you have made coffee.

/specter • **sequence**

Smart • per-lead research
4 touches • 12 days

DAY 0

Cold email

One trigger, one ask, under 60 words. No pitch wall.

DAY 3

Follow-up

Adds one proof point, never a guilt-trip nudge.

DAY 7

Value drop

Sends the one resource that fits their trigger.

DAY 12

Break-up

One line, closes the loop, leaves the door open.

HUMAN GATE holds every send. Nothing leaves until you approve.

STEP 3 • STRIKER

From first reply to **signed**.

STRIKER qualifies the lead, runs discovery, handles the objection and builds the close plan. The whole deal, one agent.

OBJECTION HANDLING • LIVE

"Too expensive."

→

ties the price to the **pipeline it replaces**, not to features

"We already use a tool."

→

maps the **gap they feel**, skips the feature war

"No time to switch."

→

shows the **one-weekend path** and books the next step

You walk in with the answer already drafted. **The deal does not stall on you.**

STEP 4 · PULSE + AMPLIFY

Write it once. Ship it **everywhere.**

PULSE drafts the post in your voice. AMPLIFY reshapes it per channel and schedules each one for its own time zone.

PULSE · DRAFTED IN YOUR VOICE

"How I run GTM solo with five agents"

1 idea
3 channels

AMPLIFY FORMATS + SCHEDULES →

LinkedIn

carousel, 9 slides, save-led CTA

● 10:00 CET

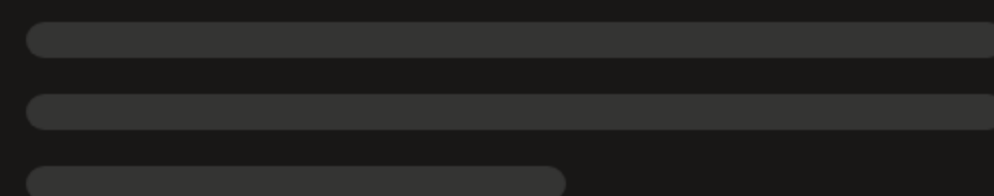

TikTok

9:16 talking cut, hook in 2s

● 18:00 EST

X

thread, one line per beat

● 14:00 PST

● AMPLIFY queues all three and posts each at peak local time

STEP 5 • ROUTER

Type plain English. The system **routes** it.

You describe the job. The ROUTER picks the agent that owns it and the model tier, then the HUMAN GATE holds the send.

> _ find 50 founders and draft the outbound this weekend

| ROUTER READS IT |

PICKS THE AGENTS

CORTEX

SPECTER

PICKS THE MODEL TIER

Lite **Haiku**

Smart **Sonnet**

Deep **Opus**

HUMAN GATE holds every send. You stay the operator, not the bottleneck.

You don't need more reps. You need an operator.

Five steps. Five agents. One operator that runs them while **you approve every send**. That is your GTM, live by Sunday.

THE FULL ROSTER · 5 RUN THE BUILD, 7 RUN THE COMPANY
