

answer vs research

You ask Claude for the **answer.**

Make it do the **research.** Read the sources, compare, cite. Not a guess.

 **Research run**

12 sources read

 **G2 + Capterra reviews**

4 pages **READ**

 **Competitor pricing pages**

5 pages **READ**

 **Founder threads, Reddit**

3 pages **READ**

SYNTHESIZED

Ranked 9 options by price, integrations and support. Every claim cited.

+4

A ranked, **cited** shortlist

1

Best overall fit

wins on price and native CRM sync

[1]

[2]

2

Most integrations

widest set of native connectors

[3]

[4]

3

Easiest to start

simplest onboarding for small teams

[5]

×

Skip this one

hidden per-seat pricing at scale

[6]

[7]

No guessing. Receipts.

No invented facts

every claim links to a source

0 made up

Current, not stale

reads today's pages, not old memory

today, not 2023

A decision, not a lecture

ranked and compared, not a blob

ranked 1-9

Audit-ready

click any citation to check it

12 links

Stop asking. Make it **research**.

SAY**"Research, do not guess"**

name the question and the options to compare

FEED**Give it the sources**

paste links, docs, or let it pull them

DEMAND**Citations + a ranking**

no claim without a source next to it

SAVE THIS, THEN

Comment **RESEARCH** for my deep-research prompt
