

claude tool use

Claude can use tools. It still **asks first.**

Point it at your stack and it does the work, then **waits for your yes before anything sends.**

Claude is working"find this lead, save it, draft the intro"

✓ Searched the webweb search DONE

✓ Saved it to the CRMcrm DONE

✓ Drafted the introemail DONE

🔒 Send the emailgmail WAITING FOR YOU

What it can **actually** do

Search and read the web

live pages, not stale memory

Write and run code

build a tool, crunch a spreadsheet

Run your CRM and leads

enrich, save, update deals

Email and book calls

draft, send, schedule

Post to Slack and docs

updates, notes, briefs

Pull revenue and charge

invoices, links, MRR

What runs, **what waits**

Read, search, analyze

RUNS

Draft and build

RUNS

Send an email

WAITS FOR YOU

Charge a card

WAITS FOR YOU

Post in public

WAITS FOR YOU

Stop being the **copy-paste**

BEFORE, YOU

- ✗ Ask, then copy the answer out
- ✗ Switch to the CRM, paste, fix it
- ✗ Open the inbox, retype the email

AFTER, CLAUDE

- ✓ Searches, saves and drafts in one go
- ✓ Updates the CRM itself
- ✓ Writes the email and waits for your yes

Stop pasting. Let it **act**.

Connect a tool or two

CRM, inbox, calendar to start

Give it the whole task

"find, save and draft", not one step

Approve the sends

you stay on the gate

SAVE THIS, THEN

Comment **TOOLS** for my Claude tool-use setup
