

SAVE THIS CAROUSEL

I stopped reading walls of text. Claude builds the canvas.

When an answer has structure, it renders as an **editable canvas** next to the chat. The reply stays one line. You sort it, score it and ship it.

SWIPE →

When a reply becomes a canvas.

You ask to compare

table

Options across criteria become a sortable table.

- vendors
- tools
- plans

You ask to rank

score card

A weighted score and a ranked shortlist.

- leads
- ICPs
- bets

You ask to plan

sequence

Steps over time, each with an owner.

- launch
- onboarding
- GTM

Four kinds of canvas.

- **Table**

Options versus criteria, side by side.

9 COLS · SORTABLE

- **Score**

Weighted, with a total and a rank.

OUT OF 100

- **Sequence**

Steps over time, each with an owner.

7 STEPS

- **Blueprint**

Named prose sections you can edit.

6 SECTIONS · MD

I typed **audit my GTM.**

6

areas audited

0

strong areas

3

critical areas

1

line of chat

Six stages, each scored.

ICP

CRITICAL

Website
CRITICAL

Content
WEAK

Sales
OK

Outbound
WEAK

Current, then **recommended.**

CURRENT

- ICP lives in a doc, not enforced
- Website speaks to every segment
- Outbound is high volume, low relevance

RECOMMENDED

- One ICP enforced across all GTM
- One segment, one clear message
- Targeted sequences with real pain

One click out.
