

THE ULTRON WORKFORCE

SEVEN AGENTS. ZERO GAPS.

A GTM team you do not have to hire, brief or schedule. *You type plain English and the router picks.*

SEVEN AGENTS

ONE ROUTER

THE ROSTER

Each one owns a job end to end. None of them is a chatbot.

CORTEX

Research

profiles people, companies and markets into one ranked brief

SPECTER

Outbound

cold emails, follow ups and multi step sequences

STRIKER

Deals

qualification, discovery, objections, proposals, close plans

PULSE

Content

posts, launches, newsletters and thought leadership

SENTINEL

Code

reads, writes, tests and ships code, opens the PR

AMPLIFY

Publishing

formats and schedules each asset per channel and time zone

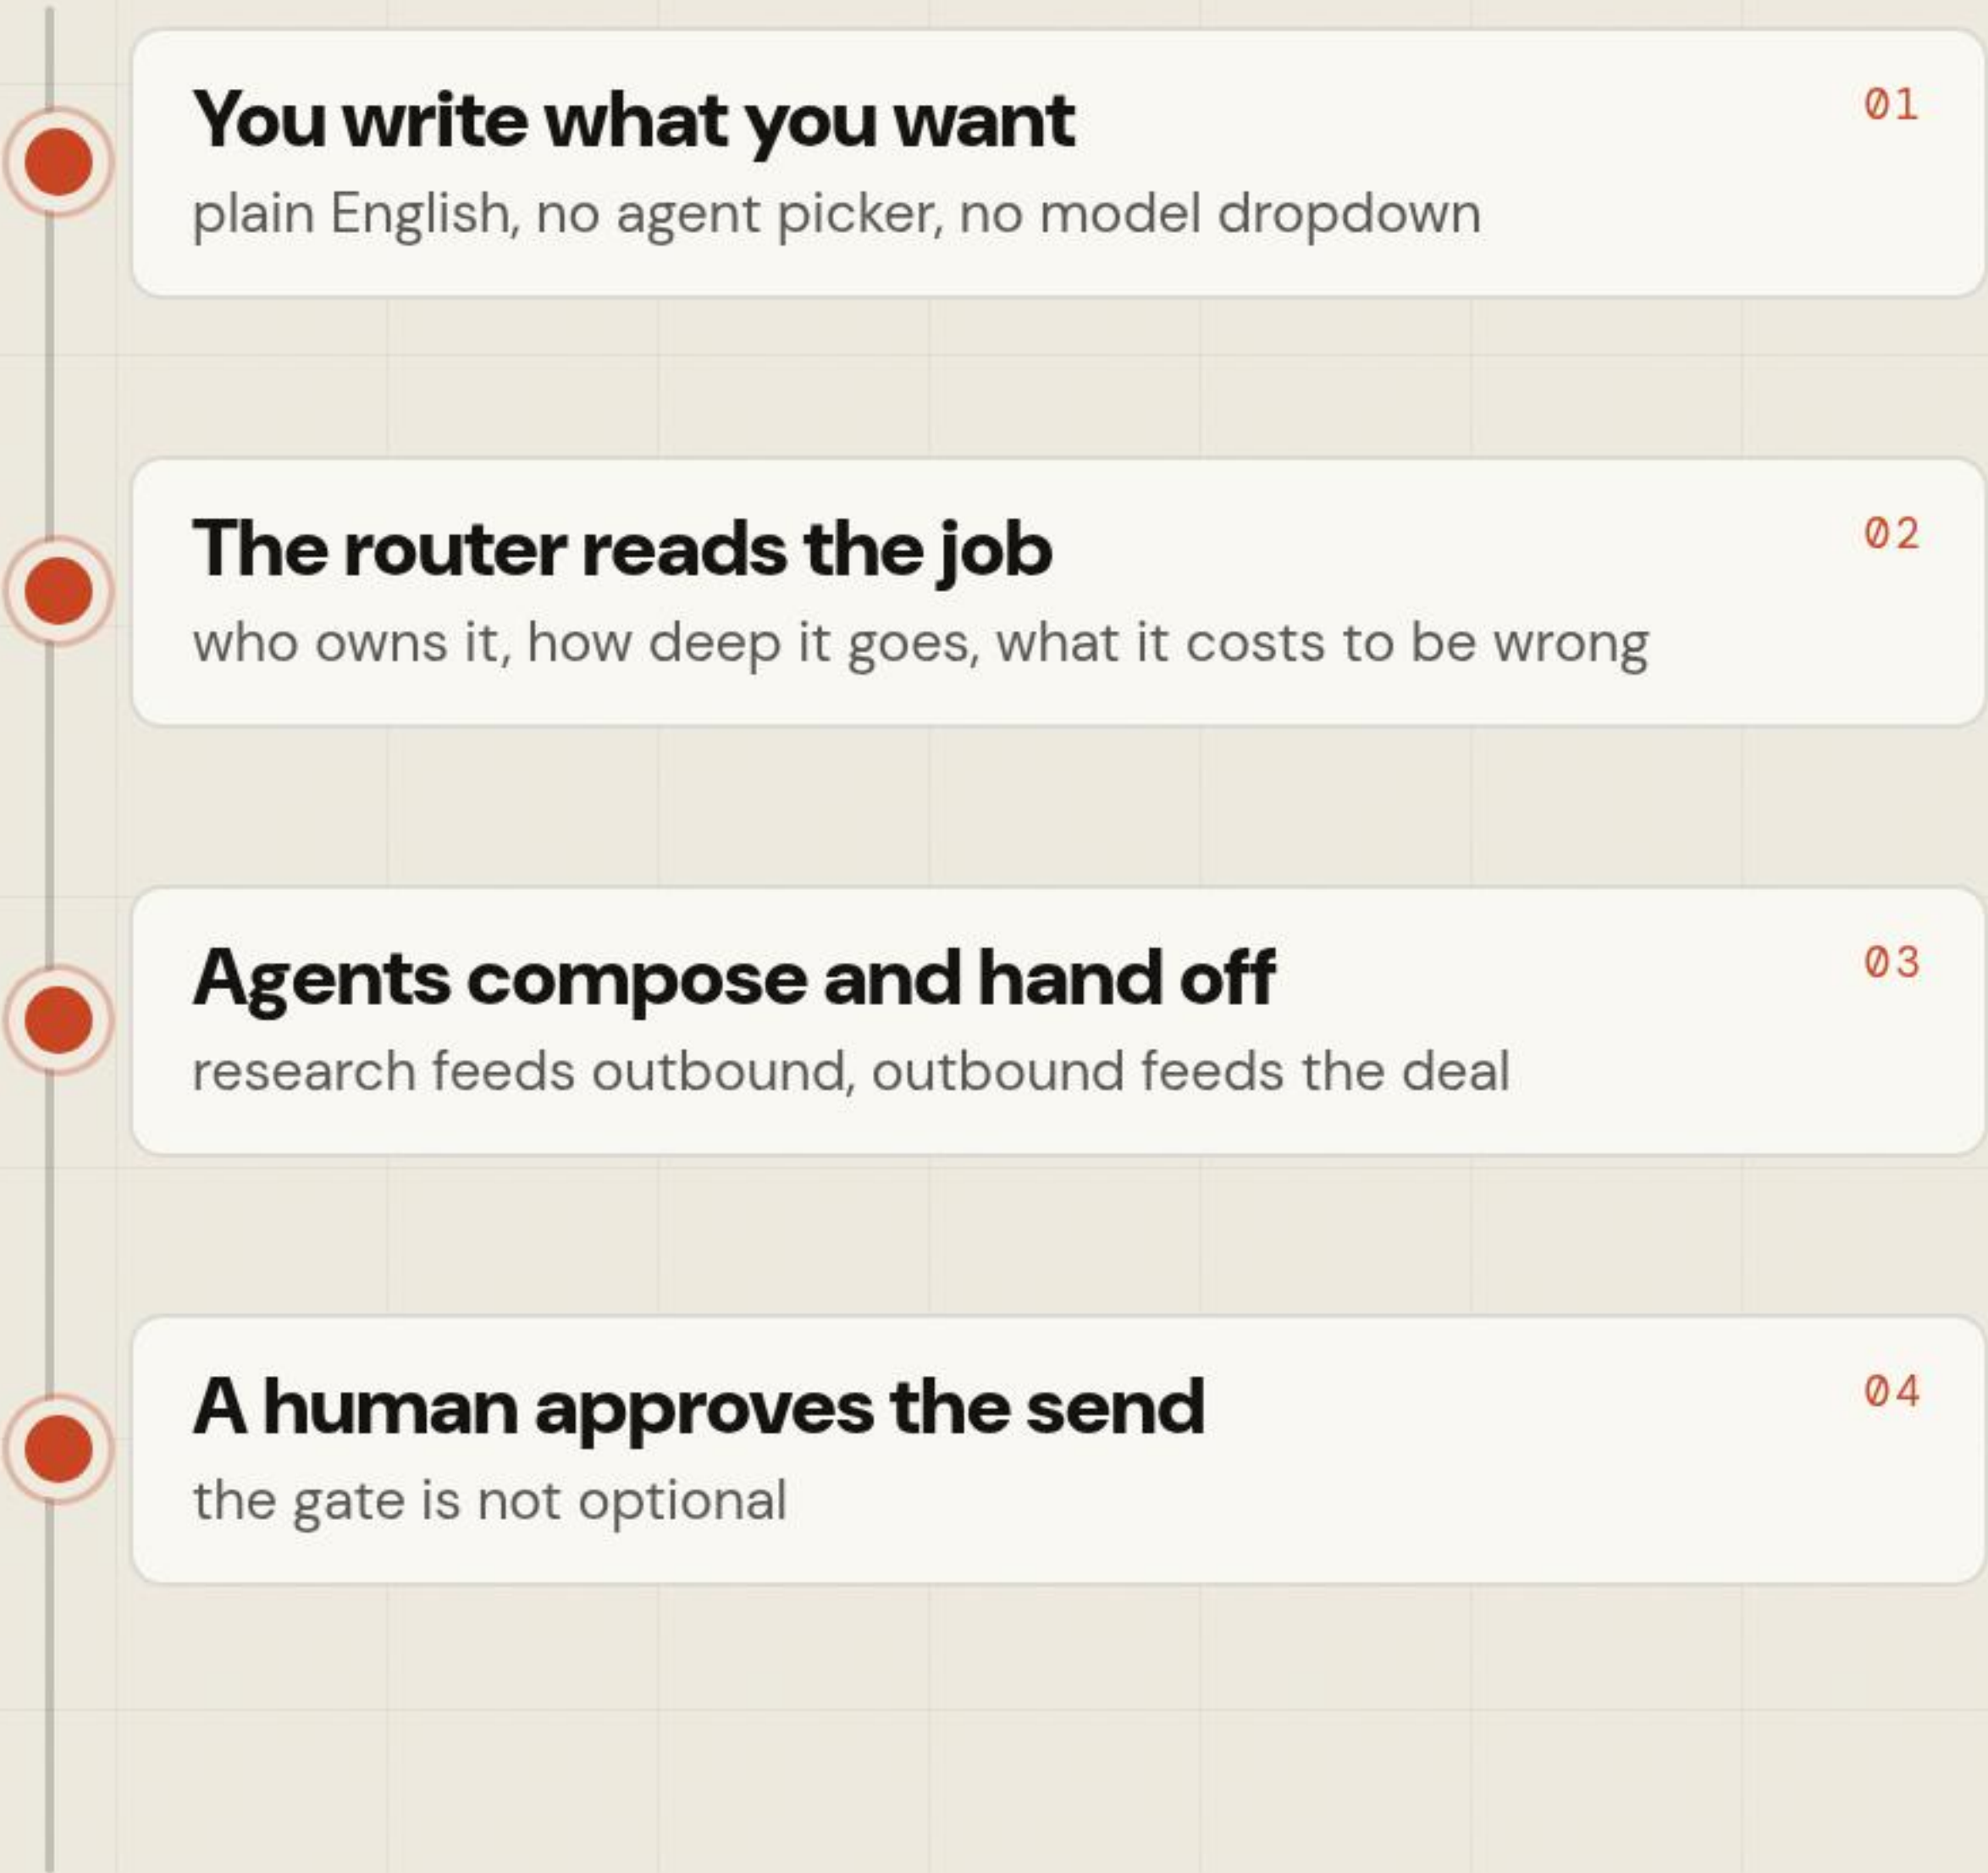

AND

COUNSEL drafts and reviews the paper

YOU NEVER PICK ONE

The router is the composer. It reads the job and dispatches it.

WHAT EACH ONE REPLACES

The honest version: this is a headcount question, not a software one.

- 01

CORTEX

the two hours before every call you never get back

RESEARCH
- 02

SPECTER

the SDR you cannot afford at eight people

OUTBOUND
- 03

STRIKER

the sales lead who reads the objection you missed

DEALS
- 04

SENTINEL

the engineer you interrupt for a landing page

CODE

THE POINT

seven jobs, one operator

TEAM OF SEVEN

What a founder actually compares this against.

HIRING FOR IT

months

- seven roles to define
- seven people to source and close
- onboarding before output
- salary before revenue

RUNNING IT

minutes

- seven agents already briefed
- context shared across all of them
- no standup, no handover doc
- a gate you hold yourself

THE TRADEOFF

judgement stays yours, labour does not

COMMENT

AGENTS

and I will send you the full roster with what each one owns.

01 Seven agents, one router

02 Plain English in, no picker

03 Human approval before anything sends
