

THE ROUTING MAP

EIGHT JOBS.
ONE AI WINS
ONE.

Run your whole GTM through a single model and it is the right tool for one job. *The other seven ship on the wrong AI.*

8

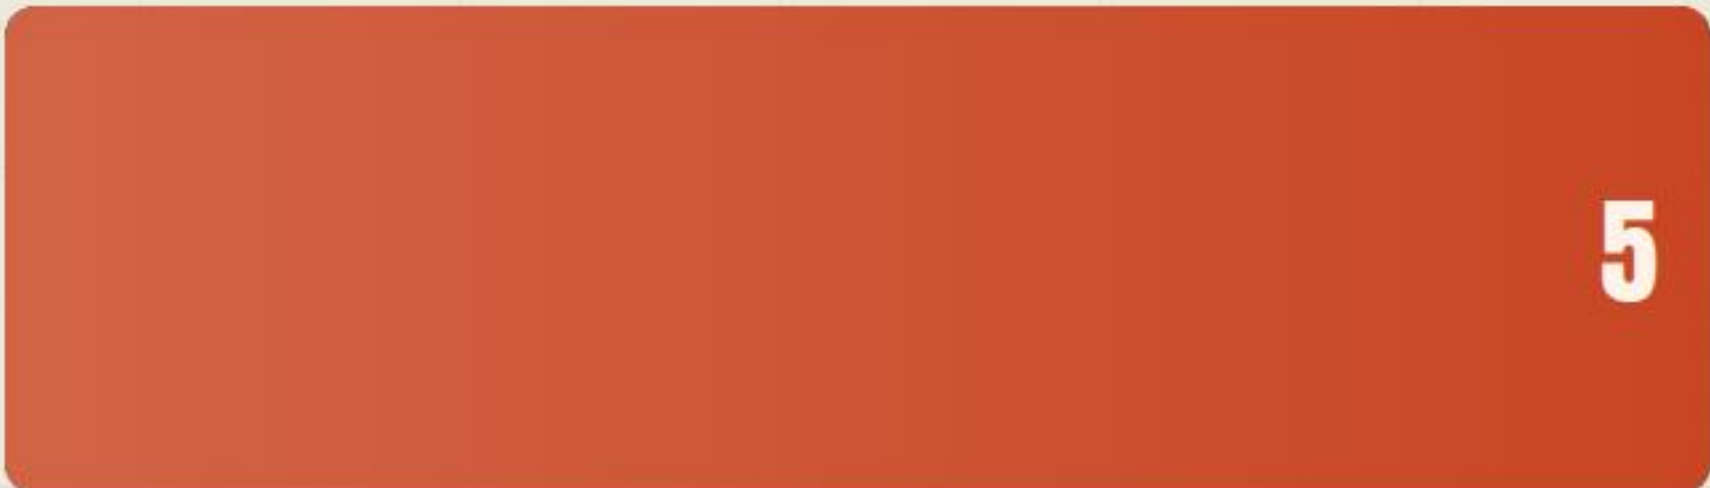

GTM JOBS

ONE WINNER EACH

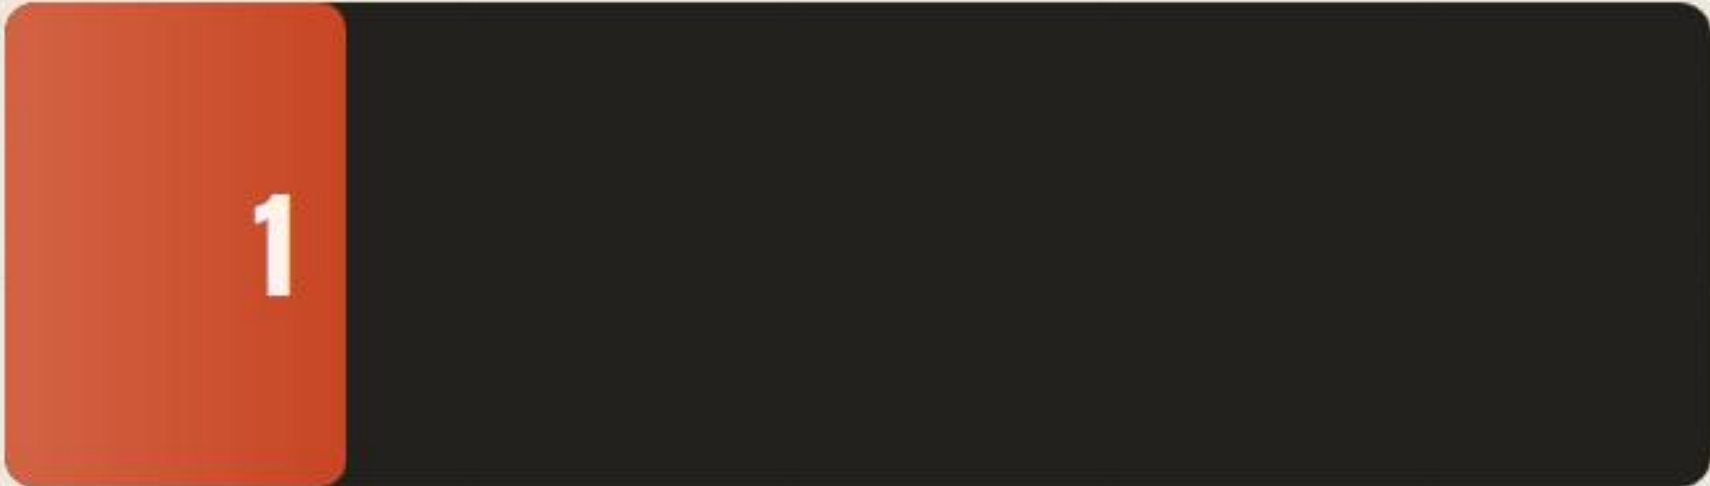

WINS BY MODEL

Eight founder GTM jobs, scored by which model actually won them.

LONG CONTEXT
ENRICHMENT

Perplexity
LIVE RESEARCH
SIGNALS

THE READ

best single model wins 5 of 8

THE MAP

Which job goes where, and why it is not a preference.

01

Lead research

live funding and hiring signals before you write a word

PERPLEXITY

02

Account enrichment

long context, reads Google native data without truncating

GEMINI

03

ICP scoring and outreach

holds your tone and scores fit honestly

CLAUDE

04

Follow up to close

surfaces the objection you were about to walk past

CHATGPT

ONE MODEL VS THE **MAP**

The same eight jobs, run two ways.

ONE MODEL, EIGHT JOBS

1 of 8

- right tool for one job
- seven ship on the wrong AI
- you tune prompts to fix a routing problem
- polished noise, faster

ROUTED

8 of 8

- each job to the model that wins it
- context held across all eight
- one gate before anything sends
- you stop choosing tabs

THE FIX

never a smarter model, a routing layer

WHAT THE ROUTER READS

Four reads, before a single token of output.

VOLUME

How big is it

forty accounts in one pass, or one careful answer

DEPTH

How deep does it go

a lookup, or a judgement you would defend

RISK

What does wrong cost

you review it, or it goes to a customer

LATENCY

How fast do you need it

now, or by the time you are back

COMMENT

ROUTING

and I will send you the full eight job routing map.

01 Eight jobs, one winner each

02 Context held across all of them

03 One gate before anything sends

WHERE IT LIVES
