

ONE NIGHT

YOU CLOSED THE LAPTOP. IT KEPT **GOING.**

The company only moves while you are at the desk. It does not have to.

Anything that will not finish before you sleep becomes a job instead.

ONE LINE BEFORE BED.

Not a spec. Not a ticket. One sentence of
intent.

Nobody to brief in the morning and no standup to
schedule.

IT DISPATCHES A TEAM.

Not one model answering alone.

Browsing the sources, running the skill that owns the job,
writing the files.

IT SHIPS AND CHECKS.

A real address, then a browser opened
against it.

Output you still have to verify is not finished work. It is
homework.

WHAT ACTUALLY CHANGED

THE DAY STOPPED ENDING WHEN **YOU** DID.

Eight hours a night you were never using
anyway.

You did not find more time. You stopped being the thing
time depended on.

COMMENT

OVERNIGHT

and I will send you the overnight setup.

How to brief it, and how it verifies before it stops.
