

talk vs do

You think Claude just **talks**.

Connect it to your stack and **it does the work**. Not chat. Actions.

 Connected to your stack

6 tools live

 Your CRM

 Inbox

 Calendar

 Slack

 Stripe

 Docs

 Updated 14 deals after the call

CRM

 Drafted 6 follow-up emails

INBOX

 Booked 3 discovery calls

CALENDAR

What it can **run**

Your CRM

logs calls, updates deals, moves stages

Inbox

drafts and sends your follow-ups

Calendar

books, reschedules, sends invites

Stripe

pulls revenue, flags failed payments

Slack + Docs

posts updates, writes the briefs

One brief. **It ran.**

09:02	Logged the 11am call, updated the deal	CRM
09:03	Drafted 4 follow-ups in your voice	INBOX
09:05	Booked 2 demos for Thursday	CALENDAR
09:06	Posted the pipeline update	SLACK
09:07	Flagged 2 emails for your approval	GATE

An operator, **not** a chatbot

Your stack runs itself

you brief, it executes across tools

6 tools, 1 chat

Stop copying between tabs

no more paste from CRM to email

0 tab-switching

Nothing ships without you

the Human Gate holds every send

you **approve**

It finishes the job

a done task, not another draft

done, not **draft**

Stop chatting. Start shipping.

CONNECT

Plug in your tools

CRM, inbox, calendar, Slack, the lot

BRIEF

Tell it the job

what to do and what good looks like

APPROVE

It runs, you sign off

the Human Gate before anything sends

SAVE THIS, THEN

Comment **STACK** for my connect-your-tools setup
